

# Aircurve ST

The AirCurve™ 10 ST is a bilevel device with backup rate that provides exceptional patient–ventilator synchrony, reducing the work of breathing so patients remain comfortable and well-ventilated. It's an ideal choice for reliable, cost-effective noninvasive ventilation when alarms are not required.

## UNIT FEATURES:

- Vsync continuous leak management enables reliable delivery of therapy pressure while maintaining patient-device synchrony
- Climate Control delivers a constant, comfortable temperature and humidity level during therapy
- Integrated wireless technology is built into every AirCurve 10 device – no module or SD card is needed.
