Masimo Root Vital Signs Monitor

Streamline clinician workflows with Root, a versatile patient monitoring platform. Root integrates noninvasive technologies usually found on multiple separate devices into one comprehensive, powerful vital signs monitor. The Root Platform is compatible with a variety of disposable and reusable blood pressure cuffs for adult, pediatric, infant, and neonatal patients. The root Platform is adaptable to various work flows with an integrated oral/axillary temperature module to fit various workflows and use cases.

Root offers multiple high-impact innovations for use across the continuum of care:

- Integrates Masimo's breakthrough measurements from the Radical-7 handheld monitor
- Instantly interpretable, high visibility display with intuitive, multi-touch navigation for easy and Adaptable use in hospital environments.
- Integrated noninvasive blood pressure and temperature monitoring
- Automates the calculation of Early Warning Scores (EWS)

Integrated Monitoring

- Masimo SET Measure-through Motion
- Low profusion.
- High-visibility display
- Intuitive touchscreen navigation
- Highly customizable

NIBP Modes

- Automatic Interval
- Stat Interval
- Spot Check
