

# Noa Low Bed 42"

The Noa 42" Bariatric Low Bed will address the majority of your bariatric population weight and width requirements. A 600lb safe working load allows even your heaviest residents to benefit from variable heights and positions. The bed swiftly moves from heights 9.5" to 28" and can accommodate your taller residents with an expandable length of up to 84". For added comfort the bed can be put into a full recliner position.
